Bundaberg Clinic:
P: 07 4151 5222
E: bundaberg@fssc.com.au

Overview of Costs

This is an overview of our Fertility Treatment Fees. Individual circumstances, such as access to Medicare, can alter costs. Once your fertility Specialist has issued a treatment plan, administration will provide you with a personalised treatment quote and discuss accordingly.

There may be additional costs by Fertility Solutions associated with your cycle such as donor workup and lab procedures. You will also have associated costs from external providers (where applicable) such as Specialist+, Pharmacy, Hospital and Anaesthetist.

Private Health Insurance will generally only provide coverage to Inpatient Services and not Outpatient Services. Majority of the Item numbers used by Fertility Solutions are classified as Outpatient Services. If you have Private Health Insurance, you must check with your fund to see if you have coverage for the following Inpatient Services, item numbers - Hospital OPU (13212) and Hospital TESA (37605).

To receive full safety net rebates, you will need to reach the applicable Medicare Safety Net Threshold. If the threshold is not reached, the out-of-pocket expenses may be more than the list information below. [Click for more information about the Medicare Safety Net.](#)

Price subject to change without notice. *Conditions apply to Bulk Bill and Elective Oocyte Freeze Treatments.
